CARGO DIGGER PLANT2

New ideas for modern excavator transport

UNITED KINGDOM

CARGO DIGGER PLANT2

Tough. Yes.
Intelligent. Yes.
Adaptable. Yes.

5 5 YEAR
CHASSIS
WARRANTY

The innovative **CarGO Digger Plant2** range provides a modern, advanced and compliant transport solution for many tracked excavators and plant machines such as chippers and shredders. With obvious appeal to larger organisations the ideas pioneered in Digger Plant2 also translate to medium and small size fleets interested in efficiency and safety.

Being a part of the Brian James Trailers portfolio, **CarGO Digger Plant2** embodies low and flexible design for optimal distribution of weight and stable towing performance.

CARGO DIGGER PLANT2

CARGO DIGGER PLANT2

Highest capacity.

CarGO Digger Plant2 has a gross capacity of 2,700kg or 3,500kg. It combines this with class leading light, but tough chassis design to achieve unrivalled payload capability. Whether moving Diggers or Dumpers our advanced low chassis design and versatile layout, achieves recommended weight distribution, ensuring stable and safe towing.

Digger Plant2 deck design is constructed using heavy duty phenol ply (18mm), with substantial under deck chassis reinforcements. Even the heaviest machinery such as road rollers or mini diggers will not cause damage. Robust steel mudguards and all around side steps provide easy and safe access to machinery on the trailer.

- **Long drawbar**
provides plenty of space for digger arms.
- **Jockey wheel.**
Heavy duty jockey wheel. Features anti-vibration latch and is positioned away from conflict with loaded machinery.

- **Multiple anchor points**
Numerous strap attachment points are provided along each side of Digger Plant2 trailers. Each is located in the chassis providing ultimate strength. A high level of grip and strength is offered by the raised, punched profile of each slot. Machine restraint is made easy with many tie-down options.

- **Universal bucket rest**
Standard fitment on CarGO Digger Plant2 trailers.

- **High grip**
Features high strength punched and formed steel. Provides grip and is extremely resistant to wear, even on tough jobs.

● Smooth-ride, self damping

Digger Plant2 trailers are designed for long distance and heavy loads. Axles and suspension technology is proven beyond doubt.

● **ACME thread clamps.** Silent locked – the loading tail ramp is held in place with secure clamp fasteners. A rubber buffer is part of the system and provides damping for quiet travel.

● **50mm ball coupling head** with security lock.

● Super-Structure

The strength of Digger Plant2 is more than skin deep. Super-strength steel used in the main chassis fabrication is complemented by two additional longitudinal beams just below the 18mm phenol ply anti-slip centre bed. Lighter weight and improved strength, combined with the durability of a hot-dip galvanised chassis ensures that Digger Plant2 will serve for many years.

● Low loading angle

The Digger Plant2 features a loading angle of 14° which enables easy loading and unloading of machines.

● **High quality lighting system** - both bright and reliable. Digger Plant2 features a high quality stylish combination bulbed lamps that are well protected from accidental damage.

○ Upgrade to full LED lighting

Replace bulbed rear lamps with LED technology. Super bright and extremely durable.

LED lamps: Note

LED lamps may not be compatible with all towing vehicles. Please check compatibility. Electronic 'Lighting Control Gear' is available as an option.

● Standard. ○ Optional at extra cost.

OPTIONS

Does the job, better.

A full working specification as standard gets the job done. We also know that each operator has differing requirements and have catered for this with an unrivalled range of optional configurations, each available at the time of order, or as a retro-fit.

O Chapter 8 Chevrons provide compliance with vehicle marking regulations for sites.

O Digger Arm Lock
Guides and secures the digger arm and bucket to the trailer with a single heavy duty locking pin.

O Bucket locker
Secure lockable storage for digger buckets and other attachments.

O DigaDoc™ recently won the prestigious 'best safety invention' award at the 2014 UK Energy Innovation Awards.

The principle is clearly intelligent and for larger fleets with a strong emphasis on Health and Safety this system offers a total solution to machinery restraint.

DigaDoc™ is a patented system manufactured by Brian James Trailers.

○ Wheel safety indicators

Wheel Sentry. Combined wheel nut indicator and retainer.

○ **Machine stop bar** designed to provide a reliable stop for digger and plant machinery. Must be used in combination with tie-down restraint straps.

○ Spare wheel

Mounted conveniently towards the front of the trailer.

○ **Adjustable punched ramps** provide low loading angle for all types of vehicles. Each ramp can be positioned across the full width in seconds. Constructed from galvanised steel, punched for high grip. Unique nylon hinge sleeves eradicate unwanted rattles and wear.

○ TracStrap system

The Tracstrap system is unique to Brian James Trailers and the Digger Plant2. This in-house designed and manufactured system offers extremely high levels of towing security with minimal effort (TÜV Nord test report 8114838799). The front chocks are adjustable and provide a fixed loading point. Each track is held in place by a 10 tonne rated 75mm wide straps (yellow) featuring heavy duty wear protectors (blue).

○ Eye coupling

40mm. Available for applications in which a pin and eye coupling is required.

CARGO DIGGER PLANT 2

○ Twin ramp 'knife edge' loading panel with spring assistance. The panel includes a dedicated mounting system for rectangular number plates.

○ DigaDoc™ – Digger tracks are guided into a semi-enclosed "cowl" on each side to secure and position the machine.

○ Digger Arm Lock

○ Bucket Locker Cage – stores the machines buckets safely and securely.

● Mudguards and side steps provide easy and safe access to machinery.

○ HD spring assisted tail lift ensures that lifting operation regulations are easily met.

○ Adjustable punched ramps provide low loading angle.

○ Eye coupling – 40mm. Available for applications in which a pin and eye coupling is required.

QUALITY

Brian James Trailers are manufacturers of class leading trailers, since 1979. When you buy a Brian James Trailer you can be absolutely certain that it is designed and constructed to the highest possible standards. Our Engineers combine top-quality craftsmanship with the best materials and first-class presentation. Light but strong, our trailers are crafted to enhance safety, efficiency and durability.

5 Year Chassis Warranty

This Brian James Trailer is provided to you with a non-transferable manufacturers warranty covering the integrity of the chassis for a period of 5 years from the date of first registration.

We warrant that under normal use, outside of accident damage or misuse (meaning driven across unsuitable territory or being overloaded) the chassis will not fatigue or fail to be able to perform its intended duties safely.

Any repair or rectification as a result of a claim under this warranty will be at Brian James Trailers cost and be carried out either at a Brian James Trailers main dealer, or at the factory HQ in Daventry, UK, at the discretion of Brian James Trailers Ltd. A repair may involve removal of the original galvanised surface finish, for which we will not be liable to reinstate to its original state.

Brian James Trailers will not be liable for any consequential loss in connection with a claim on this warranty, including recovery fees or transport to or from the place of final repair.
